

Role : Software Developer (Front End Developer)

We are looking for a skilled Web Developer who will be responsible for developing and/or designing websites for our company. You will be working alongside a team of other developers in creating, maintaining, and updating our websites.

In order for you to succeed in this role, you will need to be proficient in JavaScript, HTML, CSS, and have solid knowledge in programming applications.

Responsibilities

- Website and software application designing, building, or maintaining.
- Conferring with teams to resolve conflicts, prioritize needs, develop content criteria, or choose solutions.
- Directing or performing Website updates.
- Editing, writing, or designing Website content, and directing team members who produce content.
- Maintaining an understanding of the latest Web applications and programming practices through education, study, and participation in conferences, workshops, and groups.
- Identifying problems uncovered by customer feedback and testing, and correcting or referring problems to appropriate personnel for correction.
- Evaluating code to ensure it meets industry standards, is valid, is properly structured, and is compatible with browsers, devices, or operating systems.
- Determining user needs by analysing technical requirements.

Requirements

- Solid knowledge in programming applications.
- Proficient in JavaScript, HTML, CSS, Bootstrap and MySQL.
- Dedicated team player.
- Ability to thrive in a fast-paced environment.
- Solid ability in both written and verbal communication.
- Knowledge of programming language and technical terminology.
- Able to develop ideas and processes and clearly express them.
- High degree of independent judgment.
